

Log into PredPol

Step 1: Select Sector or leave the city-wide default

Step 2: Select Shift

Step 3: Click the filter button and remove all offenses except MVTR

Step 4: Click either 14 day or 28 day under Crime History

Step 5: At the bottom of the screen, click "Heat Map" – a "Heat Map" aka hotspot map is created from the last 14 days of incidents (or 28 days of incidents if you selected 28)

This will allow the user to zoom deep into a hotspot to see which streets/buildings are within or near the hotspot without distorting the picture. *Note: Google Base Map is used in PredPol which includes many/most business names and additionally, the Satellite View and Street View Options.*
